- PostgreSQL

LANGUAGES

- English (Fluent)
- Ukrainian (Native)

PROFILE

Enthusiastic and detail-oriented C# .NET Developer with a solid understanding of object-oriented programming and web application development. Skilled in building foundational backend systems using C#, .NET Core, and ASP.NET MVC, with basic experience in frontend development using HTML, CSS, and JavaScript.

Eager to learn and grow in a professional environment, with hands-on experience gained through academic projects, including creating RESTful APIs and working with databases like SQL Server using Entity Framework. Familiar with software development principles such as SOLID and Agile methodologies.

Highly motivated to enhance technical skills, contribute to team projects, and build scalable, user-friendly applications. Known for a proactive attitude, problem-solving mindset, and dedication to continuous improvement in software development practices.

EDUCATION

Ivano-Frankivsk National Technical University of Oil and Gas
Bachelor's Degree in Software Engineering
September 2021 - June 2025

Completed a comprehensive program focused on software development, testing, and automation. The curriculum provided an in-depth understanding of programming languages, data structures, algorithms, and database systems, alongside practical experience in object-oriented programming and software engineering principles. Gained hands-on experience in designing and implementing software solutions, including web applications and automated systems. Developed a strong foundation in software quality assurance and testing methodologies, with a particular focus on modern tools and techniques. This education fostered not only technical proficiency but also problem-solving, teamwork, and analytical skills, preparing for a successful career in software engineering.
